

# Hunting seasons (EUSALP)

Kahlen, J., Svadlenak-Gomez, K., Walzer C. / FIWI, Rachel Lüthi / SNP

**Summary** Hunting seasons data reduced to day of year in the EUSALP perimeter.

## Legend

-  Hunting season
-  Not hunting season
-  No hunting due to 'all year' protection of the species
-  Species not mentioned in hunting regulations
-  No data

## 1 Data

Hunting season data was collected for all areas in the EUSALP perimeter. As hunting season starting and end dates differ between the regions, dates were reduced to 'day of year' to enable comparability. The region information was intersected with the NUTS National administration layer.

The layer shows for every day of the year where hunting for the respective species is allowed or not. Days, where hunting is discontinued during the hunting season due to special regulations (e.g. hunting not allowed on Mondays, Thursdays and Sundays; no hunting on official holidays) are also shown. The layer also shows if the species is not explicitly mentioned in the respective hunting regulations for the region and where data on the hunting season is still missing/incomplete.

### 1.1 Area data

Table 1: Hunting season geodata

Dataset	Country/region	Year created	Year updated	Source
